### Profile

---

With a strong enthusiasm for web development and its practical applications, I have honed my skills through dedicated learning and hands-on experience. My fast learning abilities and keen attention to detail have enabled me to excel in creating innovative and impactful solutions. I thrive in collaborative environments, enjoy tackling challenges, and eagerly embrace every opportunity to grow and learn. My goal is to join a dynamic team where I can apply my skills effectively and build a meaningful career as a developer.

### Education

---

**Baccalaureate in Economics & Management**, *Secondary School El Wafa* 09/2024 – Present

### Technical Skills

---

#### Frontend

React ,Angular ,HTML ,CSS ,Bootstrap, Material ui, TypeScript

#### Database

MySQL ,MongoDB

Github

### Soft Skills

---

## Projects

---

### **TalentNest**, *Full Stack Developer | Scrum Master*

A web application designed to tackle challenges in employment and freelancing platforms, such as unemployment, platform saturation, trust issues, and poor quality services.

Visitors:

- Design the homepage and implement intuitive navigation for seamless platform exploration.
- Provide easy access to FAQ and support resources.

Freelancers:

- Enable profile creation and portfolio showcase with dynamic forms.
- Facilitate job application workflows to connect freelancers with opportunities.

Recruiters:

- Create job posting functionality for recruiters to list opportunities efficiently.
- Develop a freelancer matching algorithm to recommend suitable candidates based on skills and history.
- Implement a ratings and reviews system for feedback on completed work.

Admins:

- Manage users and ensure smooth platform operation with an intuitive dashboard.
- Integrate analytics and reporting features for tracking platform performance.

Built with HTML, CSS, Bootstrap, Python, Flask, and SQL.

### **Cook Me**, *Full Stack Developer | Team work*

A web application that helps users discover and create recipes by solving every day common challenges like lack of ingredients according to dietary needs/preferences, or time constraints. Our platform provides a seamless and dynamic user experience allowing them to get tailored recipes with the ability to chat with users providing further support and fostering community engagement.

User Roles:

Visitors:

- Access to the homepage and general platform overview.

Registered Users:

- Full access to search recipes, save favorites, leave comments and ratings, and chat with others.

Admins:

- Manage users, recipes, and categories via an intuitive admin dashboard.

Key Features:

- Ingredient-Based Search: Users can input available ingredients to discover matching recipes.
- Category and Time Filters: Find recipes by type (e.g., breakfast, vegan) or cooking duration.
- Real-Time Chat: Share cooking tips and connect with other users in a live chat environment.
- Personalized Recommendations: Suggestions for picky eaters or adventurous cooks looking to try something new.
- Comments and Ratings: Users can comment on and rate posts to share feedback and enhance the community experience.

Built with Node.js, Express.js, Angular, Socket.io, and MongoDB.

### **Freshka**, *Full Stack Developer | Team work*

A Web Application serving as a direct connection between farmers and clients. This application allows farmers to sell their fresh products directly to clients and provide flexible fees through discounts. The platform also increases Farmers engagement through a forum which the ability to chat post or comment creating a sense of community.

- UI/UX Design: Developed user-friendly wireframes in Figma facilitating the task distribution and ensuring a functional and optimized user experience.
- Full-Stack Development: Developed the entirety of Front and Back-end secured CRUD web application with login and registration, homepage, user pages and forum.
- Debugging & Deployment: Resolved merging issues in a timely manner ensuring the smooth running of the platform.

- Technologies: JAVA, Spring Security, SpringBoot, Angular, HTML, CSS, JavaScript, TypeScript, Bootstrap, MySQL, Trello, Figma, Canva,

## Certificates

---

### **American Certification in Full Stack Web Development**

09-202/02-2025, Coding Dojo

Africa

- Intensive bootcamp in 3 full stacks Python, JS, and Java.
- Passed Belt exams, assignments and code reviews.
- Developed three projects offering realistic solutions with innovative features.
- Soft skills and English Language training.

### **OPSWAT Introduction to Critical Infrastructure Protection (ICIP)**

16-01-2025

- Fundamentals of Critical Infrastructure Protection: Understand the basic principles and importance.
- Critical Sectors: Identify and learn about the key critical infrastructure sectors.
